WDLL Construction Pathway

Carpentry Levels 1A & 1B

Carpentry Certification

Carpenters make up the largest building trades occupation in the industry and those with all-around skills are in high demand.

Carpenters are involved in many different kinds of construction activities, from building highways and bridges to installing kitchen cabinets. Carpenters construct, erect, install, and repair structures and fixtures made from wood and other materials.

Course Learning Objectives:

- Orientation to the Trade
- Introduction to career opportunities within the trade
- Introduction of core skills, responsibilities, and characteristics of a Carpenter
- Understanding connections to the industry
- Gaining knowledge, skills, and abilities to adhere to safety guidelines and regulations

This course offers entry-level training towards the associated NCCER certification. You must successfully complete levels 1A & 1B to be eligible to take the associated NCCER certification exam.

Note: Students must successfully complete the "Core Construction" pre-requisite course and all associated assessment(s) in order to enroll in this course.
